Profile

Experienced Software Developer with over 4 years in PHP, JavaScript, and full-stack development across varied ecosystems. Known for creating efficient, user-focused applications and managing the complete development lifecycle. Proficient in C# and currently learning .NET to enhance backend capabilities. I am passionate about tackling complex challenges and continually refining my skills. Visit my website at wizzdom.dev for more on my projects, skills, and portfolio.

Technical Skills

- Programming Languages: Proficient in JavaScript, PHP, Python, Java, and C# with strong foundations in object-oriented programming.

- Frameworks & Libraries: Hands-on expertise with ReactJS, NodeJS, TypeScript, CodeIgniter, and .NET fundamentals.

- Tools & Technologies: Familiar with database management (MySQL, MongoDB), API development, Git version control, Figma, and Webflow for UI/UX design.

- Development Approaches: Agile methodologies, RESTful API architecture, and cross-platform development for web and mobile applications.

Professional Experience

Software Developer

Thejiro Limited, Manchester, UK | Sept 2022 - July 2023

- Application & Server Management: Enhanced systems with TypeScript, PHP, and Python; optimized performance on Nginx servers.

- Legacy System Modernization: Transitioned outdated JavaScript and PHP applications to modern frameworks, improving scalability and maintainability.

- Fintech Collaboration: Worked on fintech applications with improved transaction security and optimized database management.

- API & Data Management: Developed user-friendly APIs for cross-platform integrations. Explore more projects on my
